Education

College: - Acharya Institute of Technology, Bangalore-----**2019 -2023**
- Bachelor of Engineering (B.E) in Computer Science and Engineering with CGPA:7.1/10

Diploma: - Acharya Polytechnic, Bangalore -----**2016-2019**
- Diploma in computer science and engineering,

School- Janki Ma. Vi, Janakpur Dham (Nepal) -----**2016**
- SLC (Class X, Nepal),

Experiences

JoboxHire Pvt. Ltd.- Software Developer Engineer (Founding Engineer) (Nov 2023 – May 2024)

- **Team Management:** Led a dynamic team of 20 professionals, overseeing the entire development cycle from ideation to deployment, ensuring adherence to specified timelines and quality standards.
- **Talent Acquisition:** Successfully onboarded and integrated 10 highly skilled individuals into the tech department, fostering a collaborative and innovative work environment.
- **Technical Leadership:** Spearheaded the development of cutting-edge solutions using the **T3 Stack** (Technology, Tools, and Techniques), which comprises the latest technologies and best practices in software engineering.
- **Code Quality Assurance:** Implemented robust quality assurance processes to maintain code integrity and reliability, with a focus on building scalable and maintainable solutions.
- **Complex Component Development:** Designed and built intricate components, such as a messaging service using RabbitMQ, contributing to the enhancement of the overall product functionality and user experience.
- **Full-Stack Expertise:** Demonstrated proficiency in managing **full-stack development**, encompassing backend, frontend, and database components, ensuring seamless integration and optimal performance of the software ecosystem.

Japan Grab Technology - Software Developer Engineer (June 2023 – Nov 2023)

- **Software Solution Development:** Developed and maintained custom software solutions that significantly improved system efficiency by 20%, demonstrating a keen understanding of client needs and industry best practices.
- **Cross-Functional Collaboration:** Collaborated closely with cross-functional teams to conceptualize, design, and implement new features, ensuring alignment with client requirements and project timelines.
- **Mentorship and Professional Development:** Provided mentorship to junior developers, fostering their professional growth and contributing to the team's overall expertise and productivity.
- **Quality Assurance:** Implemented rigorous testing and debugging processes, resulting in a 15% reduction in system bugs and ensuring the delivery of high-quality, reliable software solutions.
- **Project Management:** Successfully delivered 4 major software releases on time and within budget, showcasing strong project management skills and adherence to quality standards and deadlines.

Projects

Decentralized Cloud Storage System

- It is based on cloud storage, and the system is completely decentralized. The Frontend will be made using React.js, Next.js, and Tailwind CSS.
- Created a web-based user interface to facilitate distributed management of files without relying on a centralized server or third-party cloud providers; maintained full confidentiality of data; and improved reliability and scalability by leveraging distributed ledger technology.
- A modern movie website utilizing **JavaScript, Nodejs, React.js, Next.js, Express and MongoDB**.

Skills

Proficient in C, TypeScript, SQL, Tailwind CSS, Figma (UI/UX), Next.js, TRPC, Prisma, Mono repo Architecture, Nest.js

Familiar with OOPS, JavaScript, Python, Django, MERN Stack, **T3 Stack**, MongoDB, Docker

Tools used Git, Postman, AWS, Linux, Figma, Discord, VS Code, Vim, Android Studio, Expo

Soft skills

Presentation skills, Leadership, Teamwork, Logical Thinking, Hardworking, Critical Thinking.

Achievements

- Successfully Launched a Product at Jobboxhire Pvt. Ltd.
- Idea presented at “SRUJANOTHAVA” An inter-College Technical Fest and won 3rd place.
- Conducted hackathon at Acharya Institute.
