SUMMARY

Computer Science and Engineering graduate from Acharya Institute of Technology with a focus on quality assurance and testing. Experienced in ensuring software reliability, having worked at JoboxHire Pvt. Ltd. and Japan Grab Technology. Proficient in writing and automating test cases, debugging, and working closely with development teams to meet quality standards. Skilled in cloud-based testing, continuous integration (CI/CD), and using tools like Docker and AWS. Adept at improving code quality, preventing bugs, and driving team collaboration to ensure product excellence. Passionate about high-performance and scalable solutions.

PROFESSIONAL EXPERIENCE

Software Developer Engineer

Joboxhire Pvt. Ltd. | Dec 2023 – May 2024 | Bangalore, India

- Led a QA team, designing and implementing automated test frameworks to ensure product stability and quality.
- Introduced performance and stress testing practices, resulting in a reduction in system downtime.
- Developed test cases for full-stack features, ensuring a bug-free release rate.
- Mentored engineers on best testing practices, and integrated automated CI/CD pipelines to streamline testing processes.

Software Developer Engineer

Japan Grab Technology | June 2022 – Dec 2023 | Bangalore, India

- Spearheaded QA strategy for 4 major software releases, reducing bugs.
- Implemented end-to-end testing workflows that increased system reliability.
- Worked closely with developers and product managers to ensure user stories aligned with test requirements.
- Optimized regression testing cycles, reducing execution time.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science and Engineering

Acharya Institute of Technology, Bangalore (2019 – 2023)

Diploma in Computer Science and Engineering

Acharya Institute of Technology, Bangalore (2016 – 2019)

TECHNICAL SKILLS AND TOOLS EXPERTISE

Languages: C, JavaScript, Python

Frontend: Next.js, Tailwind CSS, TRPC, React Native Expo, Redux, Figma (UI/UX)

Backend: Prisma ORM, Nest.js, Node.js, REST API, GraphQL, Microservices, Django

Stacks/Frameworks: T3 Stack, MERN Stack, Mono repo Architecture

Databases: Postgres, SQL, MongoDB

Testing & QA: Automated Testing, Unit Testing, End-to-End Testing, Regression Testing, Selenium, JUnit

DevOps: Docker, AWS, Linux, Git, CI/CD (GitHub Actions), Terraform

Tools: Git, Postman, Figma, Discord, VS Code, Android Studio, Expo

Familiar With: Langchain, LLAMA2, Gemini.

KEY SKILLS

- Leadership and Team Management
- Full-Stack Development
- Problem-Solving and Critical Thinking
- Software Quality Assurance
- Time Management and Efficiency
